Energy Saving Insulation System

All Allseas Spas come with a 4 stage "Energy Saving Insulation System" Insulation system which "locks in" heat at the shell, the base (pan), the cabinet and the top of the spa and utilizes heat from the pump to further reduce heating costs. Most of our spas have extra insulation on the base (pan) and an extra layer of insulation of the cabinet, making Allseas Spas amongst the best insulated spas in the world. Unlike foam filled spas, our system allows full access to the jets and fittings for servicing.
